

5V regulated centre-positive barrel only. Q1 protects reverse polarity, NOT overvoltage.
J9 USB-B to J10 internal USB-A and Adafruit0998 A/micro-B jumper to Pico; USB_VBUS NOT tied to VS.
Core J4 pins2 and7 NC. Core power uses separate 5V Berg cable;12V position NC.
Accessory is custom3V3 SPI only, not UEXT/RS232/5V bus. Active Next adapter pending.
J1 Switchcraft mapping: 1=SRQ,2=CLK,3=GND,4=DATA,5=ATN,6=RESET. Pin-map study: passive symbols; ERC is not electrical validation. Routing complete; powered/ESD/host tests and firmware remain. 2A input fuse, 0.2A maximum LED allocation.

PROTOTYPE / 5V barrel input / NO MAINS / NOT 12V
